DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Rick Huffman on March 18, 2005.

The application has been amended as follows:

IN THE SPECIFICATION:

On paragraph [0002], --10/730,168-- has been added in the box for "SERIAL NUMBER".

Drawings

Figures 1A and 1B should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

Claims 1-20 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: Although Bosshart (US PAT. No 6,791,365) teaches a dynamic logic circuit using transistors having differing threshold voltages and delayed low threshold voltage leakage protection, one of ordinary skill in the art would not have been motivated to modify the teaching of Bosshart to further includes, among other things, the specific of latching logic, responsive to the clock and complete signals and the state of the pre-charged node, that controls the state of an output node based on the state of the pre-charged node during an evaluation period between an operative edge of the clock signal and the next edge of the complete signal and that otherwise presents a tri-state condition to the output node, as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Alvandpour (US PAT No. 6,498,514) discloses a domino logic circuit.

Sechen et al. (US PAT No. 6,549,038) discloses a method for improving the speed of conventional CMOS logic families.
